#### **TEACHER'S SCHEDULE**

##### The Magic of Shape in Ballroom

In the ballroom dances, considerable value is placed on producing pleasing shapes as we move across the floor. We will review principles that will produce high-impact, dynamic shapes in the standard dances.

##### Connection

Everybody talks about it. What is it? How can we achieve a satisfying and mechanically sound connection with our partner that allows us to move as one?

12:00 – 1245 Business Meeting

##### From Syllabus to Open Choreography

We will explore routines in Waltz and/or Quickstep that we can use to introduce our syllabus students to open choreography. The idea is to find basic combinations that syllabus dancers are comfortable with and look at ways to transform them into competitive groups. We'll look at varying timing, direction, and shape.
